

FUNCTIONALITY

This button will remove this media from the page as well as delete it from indexedDb

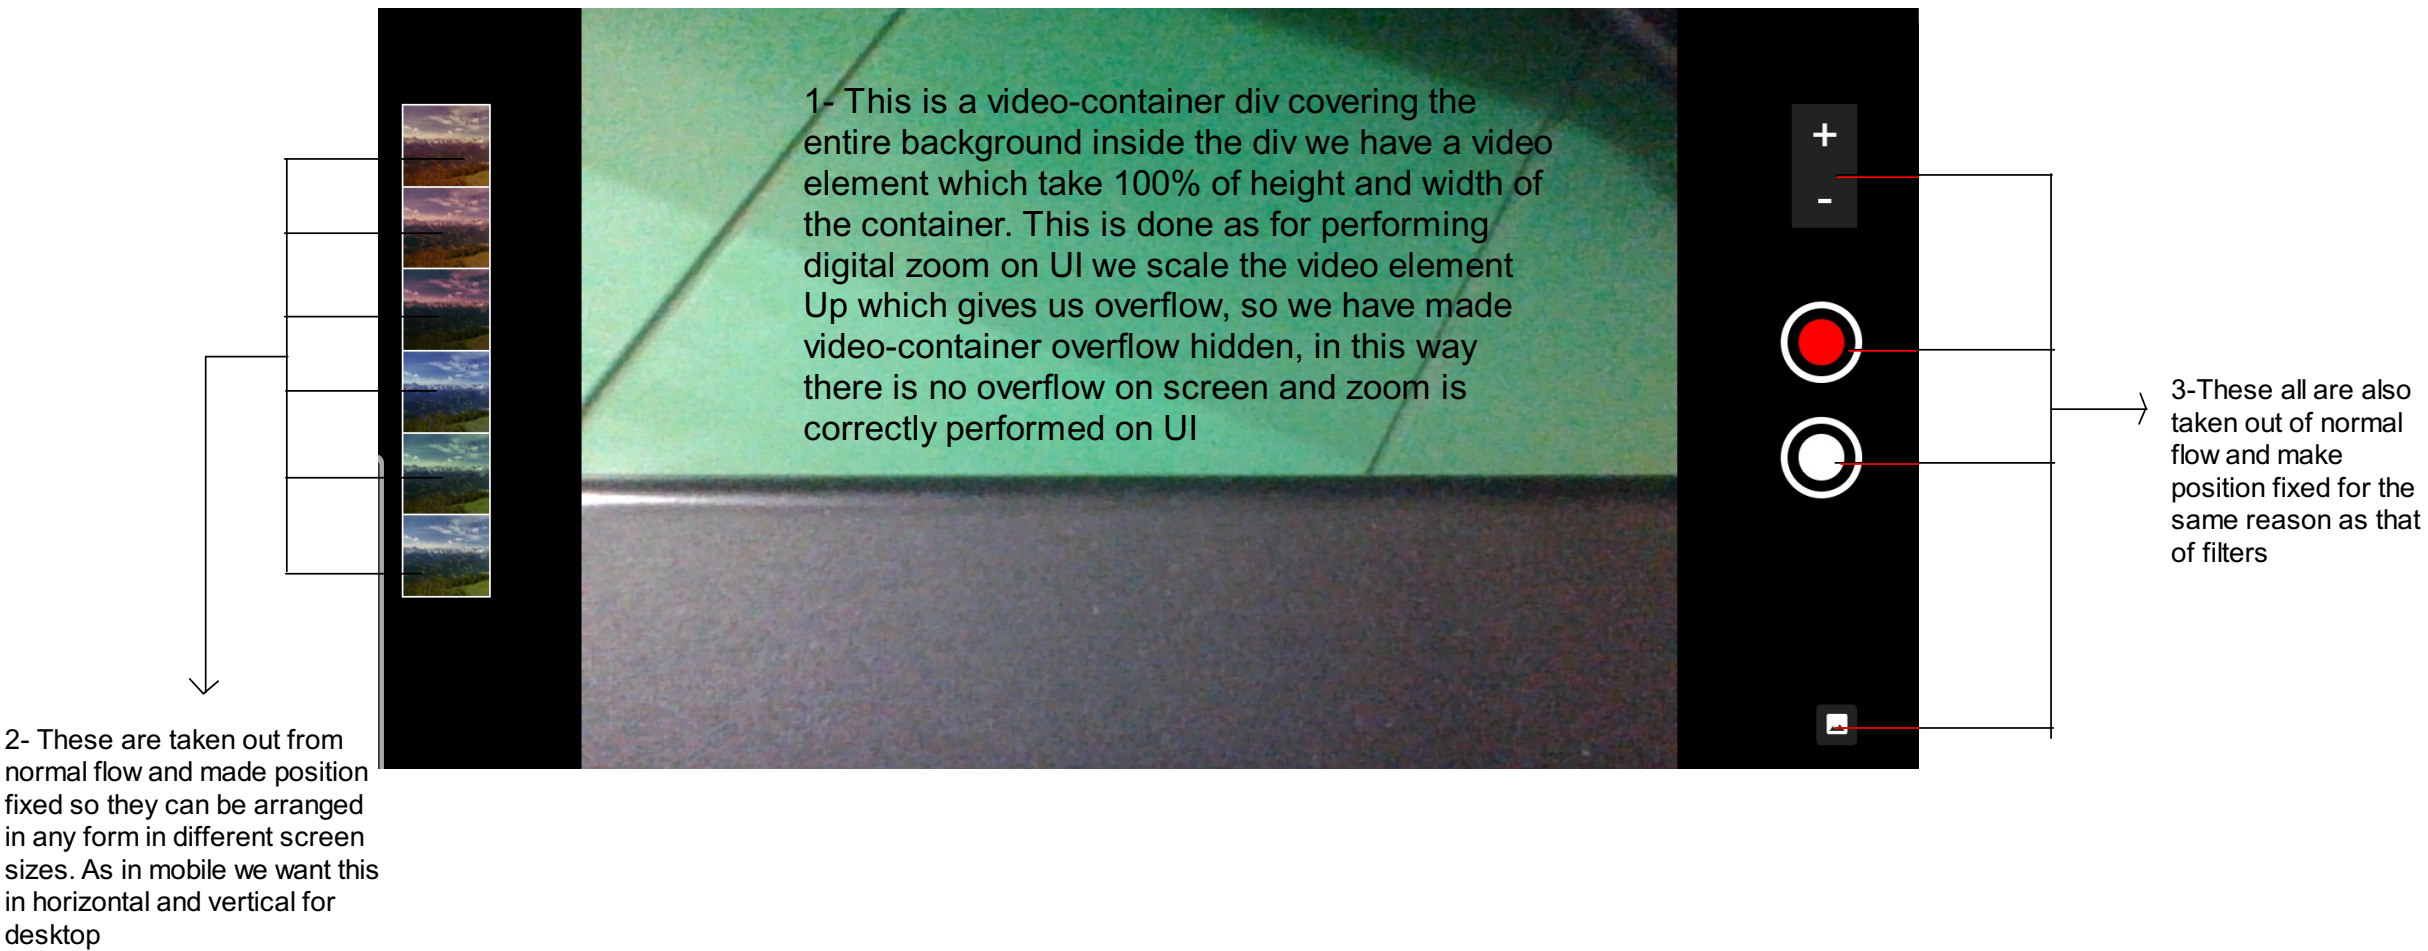

This will download the media

These are media elements. That show media stored in indexedDb videos as well as images.

This button will take us back to camera

BACK

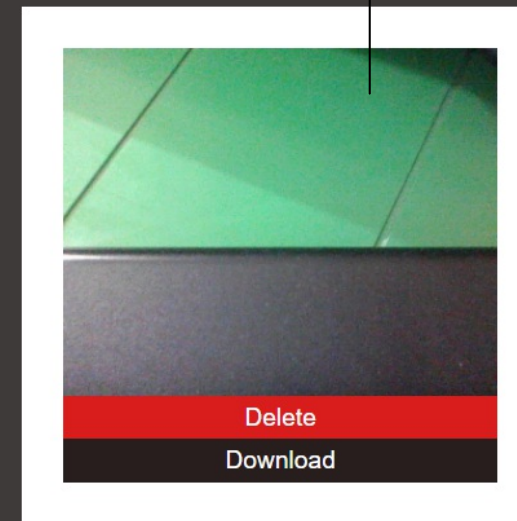

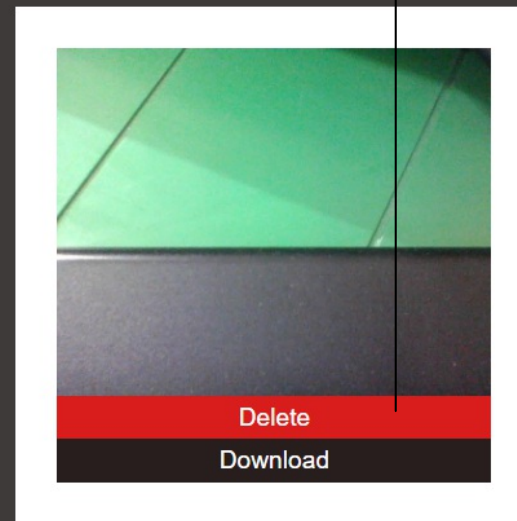

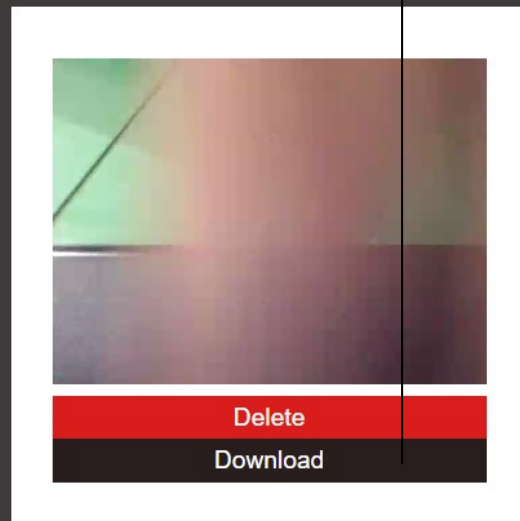

DESIGN CUES

5- Takes 10% of the height

4- Takes 10% of the height

3- Takes 80% of the height

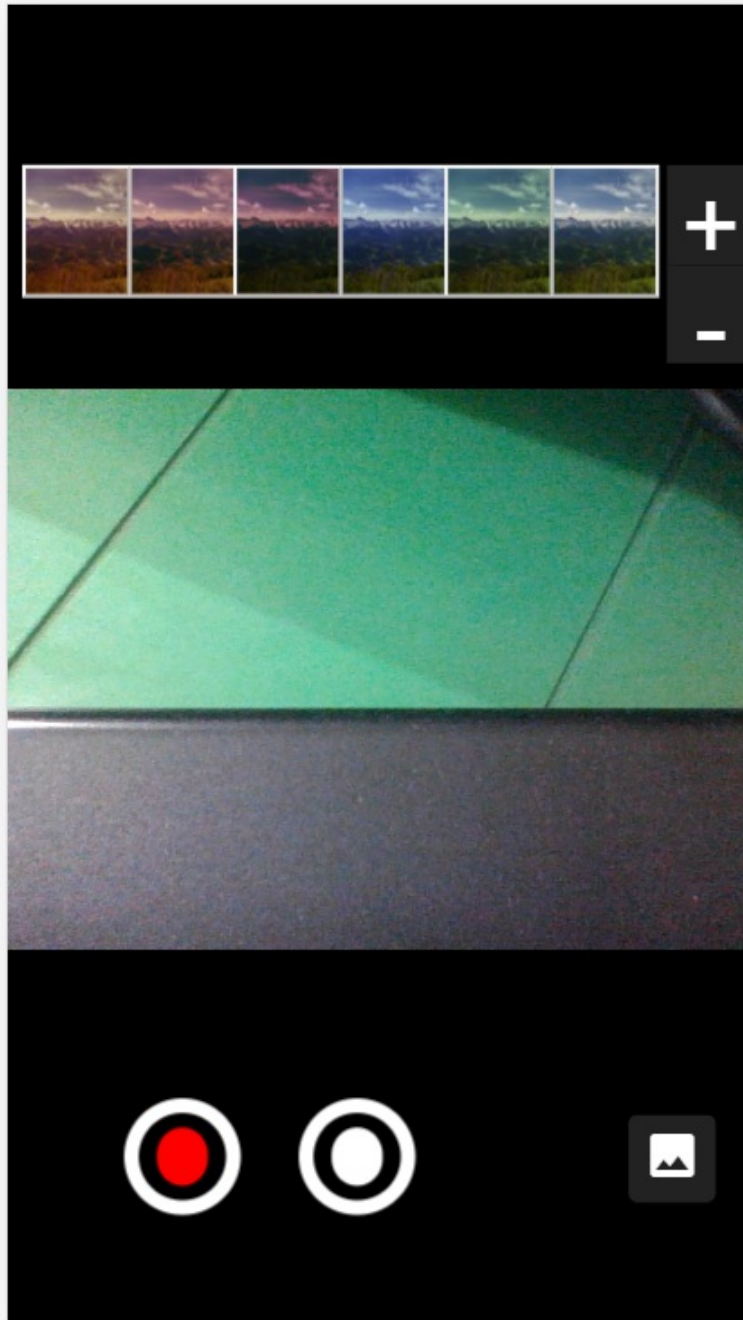

2- This is a media container which can be gallery-img-container or gallery-vid-container. Both of these have given some padding to give it that photo look.

1- The body is made brownish and also flexed with flex wrap so that these media cards can be arranged properly and all of these are divs.

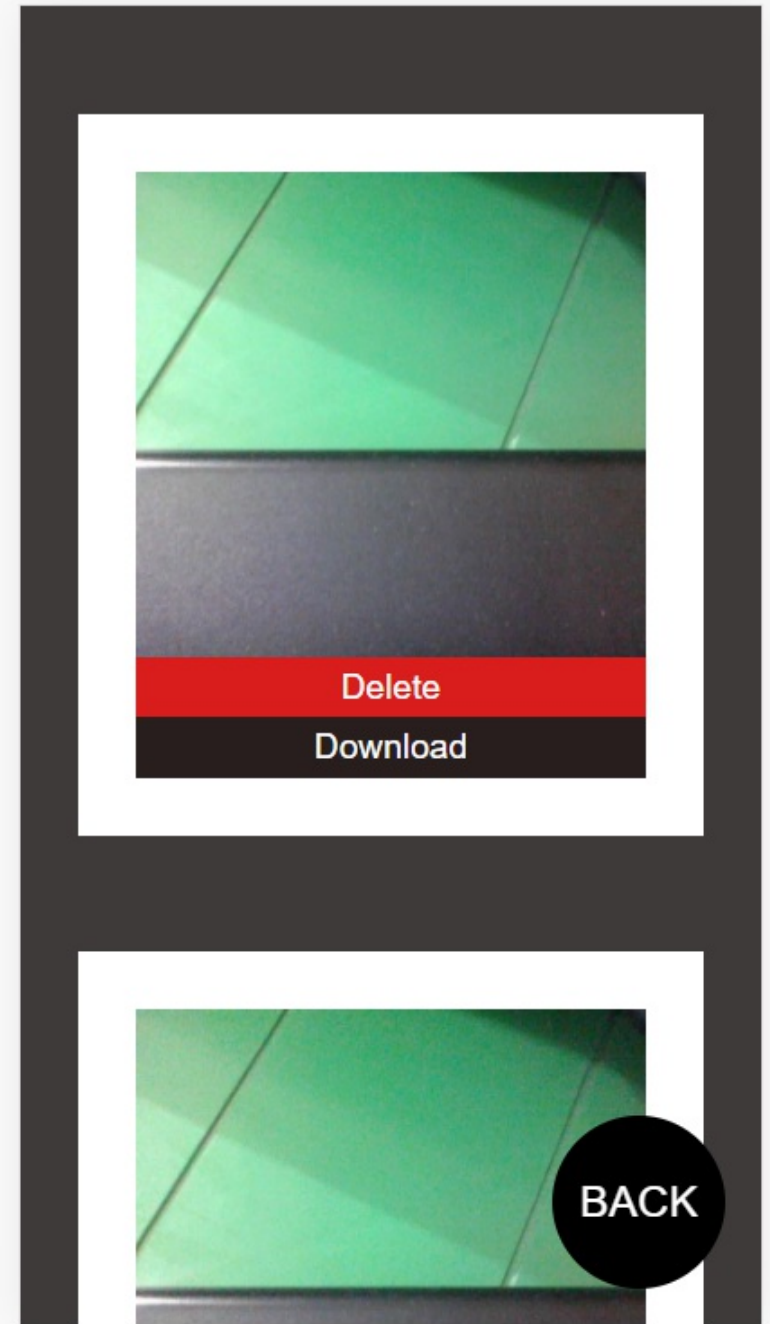

BACK

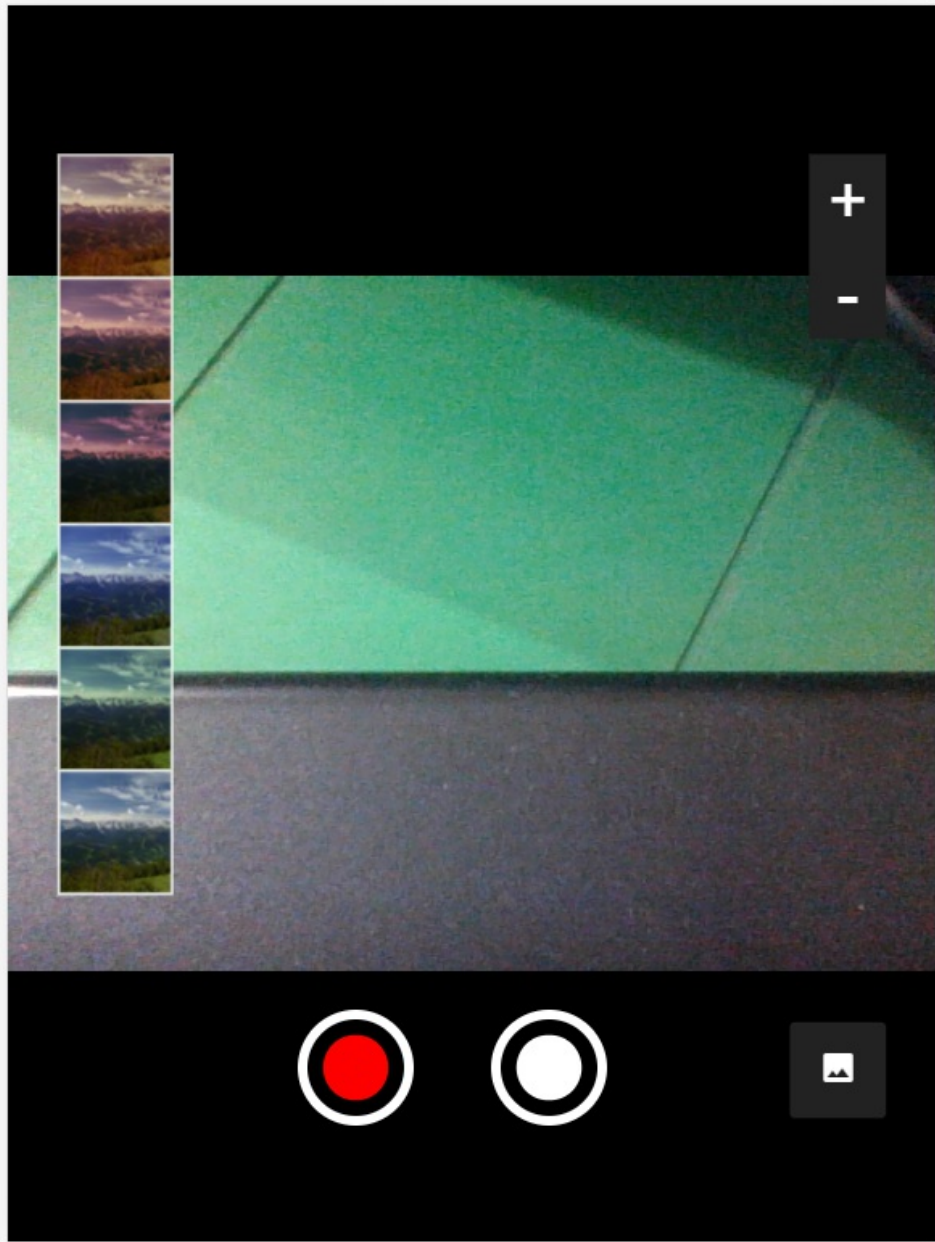

6- Removed out of normal flow as body was flexed.
